TOKYO SKYTREE 東京スカイツリー℠

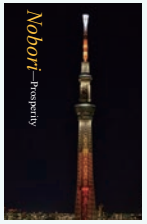
TOKYO SKYTREE Traditional Techniques and Forefront Technologies from Japan

Lighting that casts colors onto the old town scenery

Lighting patterns change among "Iki", "Miyabi" and "Nobori" alternately every day. Make sure not to miss special the lightings of each season or events as well.

The faint blue highlights on the central part of the tower body express a water theme in tribute to the Sumida River. SKYTREE's blue illumination conveys the full strength and intrepid spirit of Edo.

An intricate steel exoskeleton dressed in the decent *Edo-murasaki* theme color (bluish violet). Brilliant light as that of a gold foil accentuates the tower with elegance.



With the base color of *tachibana* (tangerine) that has been considered as a lucky color since ancient times, the design emphasizing verticality of a *Nobori* rising into the sky casts a vibrant and joyful light.
